

PARROT'S NATURE NATURAL BIRD TOYS

BY J&W PETS

Parrot's Nature is our unique natural bird toy line designed for psittacines.

We strongly believe that **nature knows best** when it comes to providing an enticing and safe enrichment. With that in mind, **all of the materials we use in our toys come from nature**. We are committed to using only natural materials and staying away from glues, dyes, plastics, fabrics, and indestructible materials. We want to provide our birds enrichment in the packaging that nature intended to elicit their natural behaviors.

A huge bonus and our top priority is that **natural materials are significantly safer** than commonly used human-made toy parts.

There are some metal components to our toys such as the metal quick links which can be nickel-plated or stainless steel (SS), as well as SS skewers and baffle cages which are optional.

Handmade & Made to order

Toys are made to order. Typically orders will be fulfilled within 2 - 3 weeks. **Shipping and taxes are** calculated at checkout.

Local delivery is available for a small fee.

Free pickup available at select locations near Houston, TX.

“INGREDIENTS”

MATERIALS USED *enrichment provided by nature*

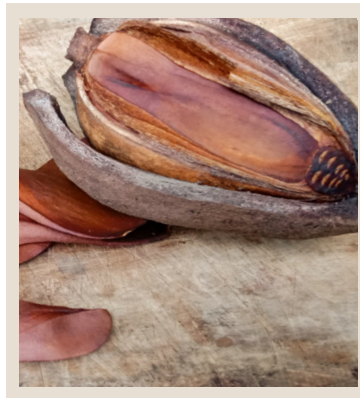

The ingredients we use in our Parrot’s Nature toys are all natural and come directly from nature. We strive to use **raw and sustainable ingredients** whenever possible. Some ingredients (i.e. pine wood beads, blocks, and slices) undergo minimal processing (cut, shaped, & sanded), however they are **never treated with any chemicals** and remain **100% natural and safe**. Below are some of the ingredients we use.

METALS: There are metal components to some of our toys such as the metal quick links which can be nickel-plated or stainless steel (SS), as well as SS skewers and baffle cages. **Some toys are strung on SS skewers** rather than natural cords though customers can opt to have a natural cord used instead. **Stainless steel is a bird-safe metal**. Some birds have the habit of snipping the natural cords at the top, the toy drops to the bottom and often gets soiled. For birds that do this, SS skewers can significantly extend the life of the toy, keep it sanitary, and be reused for many years with either toy parts or fresh produce.

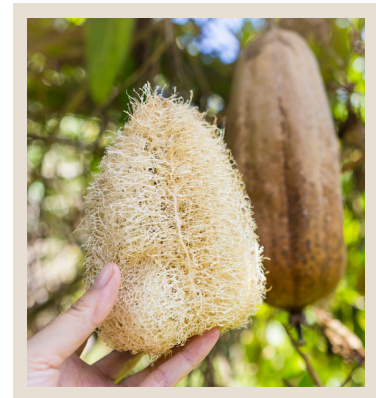

WOODAPPLE PODS

Plant species: *Feronia limonia*

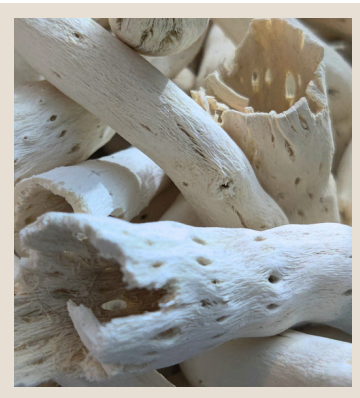

MAHOGANY PODS & STEMS

Plant species: *Swietenia macrophylla*

LOOFAH

Plant species: *Luffa Cylindrica*

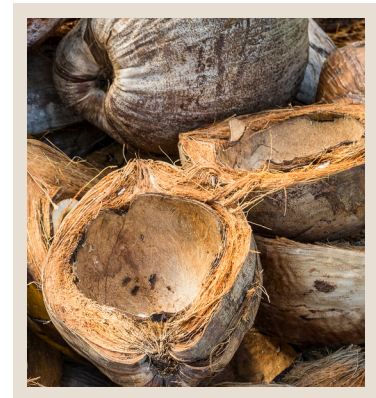

DRIED CABBAGE ROOTS

Plant species: *Brassica oleracea* var. *capitata* L.

YUCCA POLES

Plant species: *Hesperoyucca whipplei*

COCONUT HUSKS

Plant species: *Cocos nucifera*

enrichment provided by nature

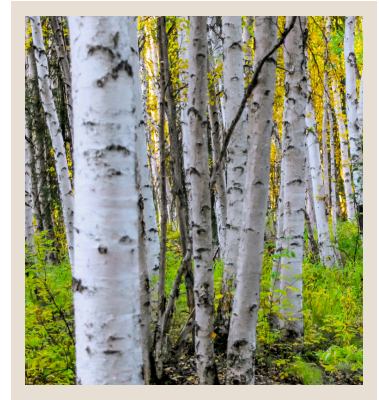

PINE WOOD

Plant species:
Pinus monticola
Pinus echinata
Pseudotsuga menziesii

PINE CONES

Plant species: *strobilus*

BIRCH WOOD

Plant species: *Betula papyrifera*

BAMBOO

Plant species: *Bambusa sp*

PALM LEAVES

Plant species: *Phoenix sylvestris*

RATTAN

Plant species: *Calamus viminalis*

VINES

Plant species: *Caesalpinia bonduc*
We also use *Vitaceae*

SOLA WOOD

Plant species: *Aeschynomene aspera*

BANANA LEAVES

Plant species: *Musa acuminata*
